11	KPI Dashboard	16
12	30/90-Day Plan	17

01 Executive Summary

Objective	Build a social and paid presence that generates qualified built-to-suit and co-investment conversations — not consumer-style follower growth.
Challenges	Content is mostly abstract, not proof-led. Instagram is near-empty (23 followers). No TikTok and YouTube accounts. No Meta Pixel or lead tracking is installed. No paid campaigns are running at all.
Opportunity	One post — the Aramex announcement — already proved the format works (185 likes vs. an 8–28 average). The brochure holds unused proof points ready for both organic content and paid creative.
Strategy	Organic: double down on named projects and leadership voice on LinkedIn. Paid: install tracking, launch a structured Meta Ads lead-gen program, and test TikTok/YouTube as awareness channels for the SME segment.
Outcomes	Higher engagement, a working paid lead pipeline with a real cost-per-lead benchmark, and full-funnel coverage across five channels instead of one.

983	185	0	0
LINKEDIN FOLLOWERS	LIKES, BEST POST	PAID CAMPAIGNS LIVE	PIXEL EVENTS TRACKED

Brand story	Founded 2024, built on a partnership with Agnice Contracting — 5M+ sq ft delivered, 100+ clients — giving single-point accountability from land to handover.
USP	In-house EPC delivery, Maximum Guaranteed Price model, single-point accountability across investment, development, and construction.
Leadership voice	Anish Kasim & Akhilesh Padinhare (Co-Founders) — their commentary already outperforms abstract posts and is the intended face of paid creative too.

PRIMARY Regional Expansion Director 38–52, MNC manufacturing/F&B/logistics. Needs a fast, compliant built-to-suit facility. Lives on LinkedIn.	PRIMARY Family Office / Private Investor 40–60, ticket size AED 10–50M+. Wants yield with a de-risked, credible sponsor. Reached through referral networks and LinkedIn thought leadership.
SECONDARY Cold Chain / Pharma Operator Needs compliant, temperature-controlled facilities — almost no dedicated content or ads exist for this segment.	SECONDARY UAE SME Manufacturer / Distributor 30–48, owner-operator, AED 2–8M budget. Fastest decision cycle — the segment paid Meta Ads should target first.

The two Primary personas convert through LinkedIn and referral; the two Secondary personas are where Meta Ads, TikTok, and YouTube.

03 Digital Presence Audit — Instagram, TikTok, YouTube, Website

PLATFORM	STATUS	DETAIL
Instagram	ACTIVE, WEAK	@aureum.ae — 23 followers, 12 posts, uniformly low engagement, no link-in-bio CTA
LinkedIn	ACTIVE, MODERATE	Aureum – The 360° Industrial Developer — 983 followers, 1 post/week, moderate engagement (~2%)
TikTok	NOT FOUND	No account located under Aureum or Aureum Asset Management
YouTube	NOT FOUND	No channel located; brochure content (BTS process, project walk-throughs) is ready-made video material
Website	LIVE, UNOPTIMIZED	Stock hero image, ungated brochure download, single undifferentiated contact form

Why this matters for paid media

No pixel, no lead form, no video-native channel means Meta Ads currently has nowhere efficient to send traffic and no retargeting pool to build from.

04 Competitor & Ads Library Analysis

COMPETITOR	FOLLOWERS	META ADS LIBRARY	AD STRATEGY & STRENGTHS
KEZAD Group	7,899 IG 	No ads	Scale, institutional trust
Dubai Industrial City	10,444 LinkedIn 	No Ads	Purpose-built zone, e-commerce angle
Group AMANA	3,768 IG 	No Ads	Established Dubai Investment Park presence
Prologis	~118,800 LinkedIn 	Running Meta ads	Lead generation ads: Property listings, warehouse tours, and location-focused campaigns. Formats: Video ads (15 sec), static creatives, and carousel-style property showcases. Why effective: Highlights specific warehouse sizes, features, connectivity, and business benefits with clear CTAs like "Schedule a tour" and "Reach out today."

REALTYADS.COM Learn More

Only Prologis is running active Meta ads. Their campaigns focus on industrial property lead generation using short video ads and property showcase creatives. The ads promote warehouse availability, strategic locations, facility features, and business advantages, supported by strong CTAs such as "Schedule a tour" and "Click here for more information." This approach is effective because it targets high-intent prospects with specific property details while creating direct enquiry opportunities. None of the audited UAE competitors are currently running Meta advertising, creating a first-mover opportunity in paid social.

05 Platform Strategy — All Channels

PLATFORM	ROLE	OBJECTIVE	CONTENT TYPE	KPI
LinkedIn	Primary	Lead generation, credibility	Named project wins, leadership commentary, Lead Gen Forms	Qualified leads, engagement
Meta Ads	Primary (new)	Paid lead generation	Retargeting, lookalikes, gated brochure, direct-response carousels	Cost per qualified lead
Instagram	Secondary	Brand awareness	Repurposed LinkedIn content, real site photography, Reels	Reach, saves
YouTube	Secondary (new)	Authority, SEO	Site walk-throughs, the brochure's 5-step process as a short explainer	Watch time, subscribers
TikTok	Test (new)	SME awareness	Short unscripted site/BTS clips — low production cost, test-only budget	Views, profile visits
Website	Conversion hub	Authority + SEO + capture	Case studies, gated brochure, deal-type routed contact form	Organic ranking, form fills

LinkedIn and Meta Ads carry the real lead volume. Instagram, YouTube, and TikTok exist to build the awareness and retargeting pool that makes Meta Ads cheaper over time.

Why BIM is at the heart of AMANA's award-winning achievements

Competitors use client stories to drive greater engagement and build **authenticity**.

Deep Dive into Warehouse Automation

Prologis highlights the implementation of warehouse automation through content such as “*Applied Automation in the Warehouse Boosts Value*” showcasing how automation technologies are being used to improve operational efficiency and create value for customers.

06 Organic Content Strategy

Proof of Delivery 35%		Vertical 20%	Executive Voice 20%	Education 15%	Culture 10%
PILLAR	SOURCE MATERIAL	BEST FORMAT PER PLATFORM			
Proof of delivery (35%)	Aramex-style wins, Agnice stats (5M+ sq ft, 100+ clients)	LinkedIn post, Instagram carousel, YouTube short			
Industry vertical (20%)	Cold storage, pharma, FMCG, automotive from the brochure	LinkedIn carousel, TikTok explainer			
Executive voice (20%)	Anish Kasim / Akhilesh Padinhare commentary	LinkedIn post, YouTube interview clip			
Education (15%)	5-step BTS process, "Aureum's Role" diagram	LinkedIn/Instagram carousel, YouTube explainer			
Culture (10%)	Team, site walk-throughs	Instagram Reel, TikTok, YouTube Short			

06 Organic Content — Monthly Calendar & Gaps

WK	PLATFORM	FORMAT	TOPIC	HOOK
1	LinkedIn	Post	Revisit the Aramex win with more detail	"What it actually took to deliver Aramex's Dubai South facility"
1	Instagram	Carousel	JAFZA vs. DIP vs. Al Quoz — rent, power, connectivity compared	"Three industrial zones, three very different trade-offs. Which one fits your operation"
2	LinkedIn	Post	Etihad Rail and the Al Maktoum Airport expansion shifting demand toward Dubai South	"Dubai South rents just hit a record high per sq m. Here's the infrastructure behind it"
2	YouTube	Short (60–90s)	Site walk-through	"Renting a warehouse and building one to spec aren't the same decision — walking through why"
3	LinkedIn/TikTok/insta	Reel	100+ client milestone	"100+ clients later, here's what hasn't changed"
3	TikTok	Short clip	Cold storage and pharma facility compliance basics	"Most warehouses can't legally store pharma. Here's the three-minute version of why"
4	Instagram/TikTok	Reel	Team/culture	"A morning on an active build"
4	Instagram	Reel	Designing facilities with solar and efficiency in mind from day one	"We plan for sustainability at the drawing stage, not as an afterthought"

07 Meta Ads — Pixel, Tracking & Lead Flow

No Meta Pixel, Conversions API, or LinkedIn Insight Tag is currently installed. This is the first task before any ad spend, since without it there is no way to measure cost per lead or build a retargeting audience.

Setup checklist

STEP	ACTION	WHY IT MATTERS
1	Install Meta Pixel across aureum.ae using Meta Events Manager	Enables website visitor tracking and retargeting audiences
2	Set up Conversions API (server-side) alongside the Pixel	Improves tracking reliability by capturing server-side conversion data
3	Define conversion events: Lead (form submissions) and Contact (WhatsApp clicks/call clicks)	Allows Meta to optimize campaigns toward users most likely to convert
4	Create creative assets: video and static formats with strong hooks and clear calls-to-action	Improves engagement and supports campaign performance

Campaign approach — why this order matters

STAGE	OBJECTIVE	WHY THIS COMES FIRST/NEXT
1. Awareness & Engagement	Reach, Video Views, or Engagement	Runs first because there's no pixel history and no prior conversions yet — Meta has nothing to optimize a Leads campaign against. This stage builds brand familiarity among UAE businesses, occupiers, and decision-makers while creating the video and page-engagement audiences the next stage retargets.
2. Retargeting	Traffic or Engagement, aimed at warm audiences	Moves the people who watched a video or visited the site toward the brochure or a landing page, building a real pool of engaged users before asking for a lead.
3. Lead Generation	Leads (Instant Forms)	Launches once there's a warm audience to aim it at. Forms should include qualification questions to improve lead quality. A cold-audience Leads campaign with no prior signal tends to produce an expensive, unreliable early cost per lead — this sequencing avoids paying that tuition twice.

Sequence matters here: Leads campaigns lean on Meta's optimization learning from prior signal. Running Leads cold, before the pixel and audiences have any history, is the more expensive way to reach the same place.

08 Meta Ads — Campaign Structure & Budget

Meta's account structure is Campaign → Ad Set → Ad. One campaign objective, multiple ad sets by audience, multiple ad creatives per ad set for testing.

LEVEL	SETTING	RECOMMENDATION
Campaign	Objective	Leads (on-Meta Instant Forms first; switch to website conversions once Pixel data matures)
Campaign	Budget type	Campaign Budget Optimization (CBO) once 2+ ad sets are proven; ad-set budgets during initial testing
Ad set	Placement	Advantage+ placements to start; narrow to top performers (typically Feed + Reels) after 2 weeks of data
Ad set	Optimization	Optimize for Leads, not Link Clicks — clicks without the Lead event as the target inflate cost per real enquiry
Ad	Format	Single-image and carousel first (cheapest to produce); short video once early creative is validated

Audience & budget allocation — Month 1 (illustrative)

AD SET	AUDIENCE	BUDGET ALLOCATION	GOAL
Awareness & Video Engagement	Broad UAE audience with relevant business and industry interests	50–60% of budget	Build brand awareness and create the engaged, video-viewer audiences that later stages retarget.
Retargeting	Website visitors, social media engagers, video viewers, and form interactions	20–30% of budget	Move users who already showed interest further down the funnel — small at first, grows as awareness spend builds the pool.
Lead Generation — Cold Audience (small test)	UAE businesses, logistics, manufacturing, industrial, and warehouse-related interests	10–20% of budget	A limited test to start reading cold-audience Lead performance, without relying on it for volume this early.

Once sufficient conversion data is available — Month 2 onward

AD SET	AUDIENCE	GOAL
Qualified Lead Retargeting	Website visitors, engaged users, video viewers, and previous form interactions	Increase conversion efficiency by targeting users who already understand Aureum's offering.
Lookalike Audiences	Built from qualified leads, customer lists, or high-intent conversion data	Scale campaigns by reaching audiences with similar characteristics to existing prospects.

09 Meta Ads — Sample Campaign, Ad Sets & Creatives

CAMPAIGN — Aureum Built-to-Suit Lead Gen • Objective: Leads

Ad Set 1 — Occupier Retargeting

AUDIENCE

IMAGES/VIDEO VIEWS + WEBSITE, LAST 90 DAYS

PLACEMENT

Advantage+ (Feed, Reels, Stories)

CREATIVE

Carousel — Aramex case study

AD CREATIVE — CAROUSEL

Aramex trusted us with their Dubai South facility. Here's what we delivered.

5M+ sq ft delivered. 100+ clients. One point of accountability from land to handover. See how a built-to-suit deal actually comes together — swipe through the process.

Ad Set 2 — SME Direct-Response (cold)

AUDIENCE

UAE, 30–55, manufacturing/logistics/industrial interests

PLACEMENT

Advantage+, narrowed to Feed after week 2

CREATIVE

Single image — real construction photo

AD CREATIVE — SINGLE IMAGE

Built for manufacturing.

Aureum designs and delivers built-to-suit industrial facilities across the UAE.

10 Funnel & Lead Routing

01 · Awareness — Organic posts, TikTok/YouTube clips, Meta Ads cold audiences

02 · Consideration — Retargeting ads

03 · Conversion — Meta Instant Forms, website form, WhatsApp

04 · Retention — Client success stories, referral requests, ongoing project updates

Built around a 6-18 month, relationship-led sales cycle — the goal is fewer, better conversations, not lead volume for its own sake.

11 KPI Dashboard

KPI	CURRENT	PROPOSED TARGET (90 DAYS)
LinkedIn followers	983 VERIFIED	1,500+
Instagram followers	23 VERIFIED	150–250
Avg. engagement (LinkedIn)	~2% VERIFIED	4–5%
TikTok / YouTube presence	None VERIFIED	Both live, posting weekly
Meta Ads — qualified leads/mo	0 (no campaigns running)	8–12
Cost per qualified lead	N/A	Set after first 2–3 weeks of live data
Case studies published	1 (Aramex, informal)	4 formal case studies
